Virginia Department of Health Date

[Signature] 8/4/08
Subdivision Agent of James City County Date

This subdivision is approved for individual on-site sewage systems in accordance with the provisions of the Code of Virginia, and the Sewage Handling and Disposal Regulations (12 VAC 5-610-10 Et Seq, The "Regulations").

This subdivision was submitted to the Health Department for review pursuant to 32.1-163.5 of the Code of Virginia which requires the Health Department to accept private soil evaluations and designs from an Authorized On-site Soil Evaluator (AOSE) or a professional engineer working in consultation with an AOSE for residential development. The Department is not required to perform a field check of such evaluations. This subdivision was certified as being in compliance with the Board of Health's Regulations by: David Schlotterer, AOSE #209. This subdivision approval is issued in reliance upon that certification.

Pursuant to Section 360 of the Regulations this approval is not an assurance that sewage disposal system construction permits will be issued for any lot in the subdivision unless that lot is specifically identified as having an approved site for an on-site sewage disposal system, and unless all site conditions and circumstances are present at the time of application for a permit as were present at the time of this approval. This subdivision may contain lots that do not have approved sites for on-site sewage systems.

This subdivision approval is issued in reliance upon the certification that the approved lots are suitable for generally approved systems. However, actual system designs may be different at the time construction permits are issued. Residential sewage flows (based upon the number of bedrooms proposed) will be determined at the time of application for individual on-site sewage disposal system permits, and the Department's permit may differ from the consultant's abbreviated design proposals.
